

Hard Drive Test Results

Date: 08/02/2021

Model: WDC WD50EFRX-68MYMN1

Serial Num: WD-WX21D7453KCJ

DTI Data

6643 1st Ave. S. st. Petersburg Florida 33707

866-438-6932

Power On Hours

09 = The number of Powered On Hours this device has been in use = [1.42] years

It is recommended to replace the drive if this value exceeds 5 years

Moved Errors

05 = [0] Bad sectors have been identified and remapped.

It is recommended to replace the drive if this value exceeds 50

Slow Sectors

C4 = [0] Total Sector Remapping attempts.

Excessive attempts is a sign of ongoing failure. Replace the drive if this value exceeds 10

Pending Sectors

C5 = [0] Damaged sectors flagged to be remapped to the Spare area of the device.

Indicates sign of increasing failure and drive should be replaced

Uncorrectable Errors

C6 = [0] Uncorrectable Sector Read/Write attempts.

Disk surface Defects and/or drive mechanics. Drive should be replaced

Reported Errors

BB = [0] Total reported unrecoverable errors using hardware (ECC)

Any value other than zero should flag a drive for replacement
